Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/806,736	Applicant(s) DAVID, JEROME	
	Examiner Richard R. Shaffer	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 May 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-33 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-33 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Specification

The amendment to the title of the application filed on May 22nd, 2006 is acknowledged and accepted by the examiner. The previous objections is hereby withdrawn.

Claim Rejections - 35 USC § 112

The amendments to the specification filed on May 22nd, 2006 is acknowledged by the examiner. The previous rejection under 35 U.S.C. 112, second paragraph is hereby withdrawn.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 25-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant is now claiming a "positioning means" which has no antecedent support in the claim 25 and is therefore new matter. The examiner feels that applicant is meaning to claim the "positioner." If however, the examiner is incorrect, applicant should in the next reply point out where in the specification such language is supported.

Applicant is also notified that claim 25 appears to be invoking 35 U.S.C. 112, 6th

Art Unit: 3733

paragraph and is thus may be improper if only one structure for performing the "means" is disclosed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shluzas et al (US Patent Application Publication 2002/0143328).

Shluzas et al disclose a bone plate system (**Figure 5**) comprising: a curved (see **Figure 3**) bone plate (**212**) having a first aperture (**250**), second aperture (**252**), and a third aperture (**254**) extending along a longitudinal axis and having an upper and lower surface; a sliding element having a top (**242**) and bottom (**270**) portion, an aperture extending along a central axis, the top portion having a compression member (lower portion of top **242**), the bottom portion having a locking member (upper portion of **270**), both the top and bottom portions having inwardly tapered walls (the top is internal, the bottom is external at the base where it interfaces with **240**), both portion have a radially outward extending shoulder (**286** and **294**), and both portions interact with an interior wall of the bone plate aperture (**250**); a bone fastener (**216**) having a longitudinal axis, stem which is orientated within the sliding element aperture; a stopping element (**240**); a threaded locking element (**228**) having a bore for receiving the stem of the bone screw and includes a concave base (**206**) and a cap (more easily seen in **Figure 3**). In

Column 5, Paragraph 57, it is further disclosed that the stopping element could have a convex surface with the bottom element having a concave surface to interact.

Shluzas et al disclose all of the claimed limitations except for the stopping element being separable and adjustable by threading as well as the method of doing so. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the stopping element (240) separate from the shaft of the bone screw, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art. *Nerwin v. Erlichman*, 168 USPQ 177, 179.

It would have been further obvious to one having ordinary skill in the art at the time the invention was made to construct the removable stopping element (240) with internal threads, since it has been held that the provision of adjustability, where needed, involves only routine skill in the art. *In re Stevens*, 101 USPQ 284 (CCPA 1954).

Response to Arguments

Applicant's amendments did overcome the rejections under 35 U.S.C. 102(b). However, the limitations applicant added to independent claims 1, 25, and 30 are the same limitations accounted for in the previous rejection under 35 U.S.C. 103(a) over Shluzas et al. Therefore, it is understood that applicant is not in disagreement over the obviousness of providing the structure and use of the positioner as claimed to the device of Shluzas.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard R. Shaffer whose telephone number is 571-272-8683. The examiner can normally be reached on Monday-Friday (7am-5pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
